FIG. 12B

A top-down view of a circular device. It features a central circular area with a stippled or dotted pattern. Within this central area, there are four small rectangular features arranged in a cross pattern, and a small circle at the very center. Surrounding the central area are several concentric rings. The outermost ring is the thickest. Various parts are labeled with handwritten numbers and leader lines: 166 points to the outermost ring, 196 points to the ring immediately inside it, 198 points to the next ring, 172 points to the ring just inside that, 216 points to the central stippled area, 204 points to the central cross-shaped features, and 220 points to the central circle.
